

Model Kits - Part Replacement Policy

We recommend that the buyer inspect the kit to make sure it is complete shortly after purchase, before beginning any assembly. Most retailers will not exchange or offer a refund for a kit that has been partially assembled.

Round 2 makes every effort to ensure our kits are complete and of excellent quality. On occasion, in spite of strict quality control, errors do occur. We apologize for any inconvenience created.

We want to make sure that our customers have a complete kit, and will make every effort to fulfill reasonable requests in a timely manner. We will only replace the parts required to complete your kit. If your kit is missing several parts, or shows severed damage, we may ask that you send the kit to us at your expense. If it is determined that the damage to the kit is Round 2's fault, we will replace the kit with an identical complete kit (or similar kit) at our expense. Round 2 reserves the right to modify or reject any replacement request, at our sole discretion.

DEFECTIVE OR MISSING PARTS / DECALS

Please return kit to dealer you purchase it from for exchange or refund. Be sure to have your receipt - most retailers will not exchange without proof of purchase. Return policies vary by retailer.

Should the dealer be unable or unwilling to exchange, (or should it be inconvenient to return to place of purchase) you may request parts replacement through Round 2 Models. Please fill out the replacement request form on the following page and be sure to include the following:

- Copy of instruction sheet with missing part clearly circled
- Original sales receipt and/or original UPC and date code cut from box (copies will NOT be accepted)
- Contact information, including shipping address, phone number and email address

Note that we cannot support AMT, MPC, Hawk, Lindberg and most Polar Lights kits manufactured prior to the fall of 2008. We do not maintain back-stock of kits that have been out of production or were manufactured by the prior companies, either RC2 or Playing Mantis/Polar Lights.

Round 2 will make every effort to satisfy the customer's need as quickly as possible; however, please note that on occasion, kits are out of stock or on backorder and we may not be able to fulfill a request.
