GENERAL ASSEMBLY

- Before assembling model, study diagram carefully.
- For best results, assemble model exactly in the order indicated.
- Take time to familiarize yourself with all the parts and their corresponding part numbers.
- Carefully cut the parts from the plastic tree supports and remove any burrs.

GLUING TIPS

- This kit is molded from the finest high-impact styrene plastic - use only cement or glue compatible with styrene.
- Test-fit parts before cementing together to familiarize yourself with their assembly, noting the points where cement is to be applied.
- Apply cement to inside surfaces only; avoid getting cement on outer surfaces of parts.
- Use cement sparingly, and avoid getting it on your hands, so as not to mar plastic surfaces
- Remove chrome plating from part surfaces being cemented. Some cements will not stick to chrome plating.
- Do not hurry. Work carefully and patiently.

PAINTING GUIDE

Paint is not required to complete this model but it is an option for the builder. For best results when painting, use only high quality paints designed specifically for use on plastic model kits. For the benefit of young modelers, Model Master acrylic paints are suggested.
